ANDERNACH CHESS: a unit (except for a king) taking an enemy unit changes colour. A rook created on an original rook's square is allowed to castle (e.g. white h4xh8=black R+ 0-0!, or black Pb2xa1=white R-> 0-0-0!).

In the diagram position only those combinations of pieces are allowed that can originate from the pieces of the initial position without promotion, in accordance with the rules of Andernach Chess (e.g.: 4 white S possible if no black S: or 2 black B on white squares if no white B on white squares).
